

GRAMPO APR

Alligator® Plastic Rivet System

For light-duty applications where metal belt fasteners can't be used, Alligator® Plastic Rivet Fasteners are a long-lasting, easy-to-install alternative.

Features and Benefits:

- Beveled leading edges for smooth interface with conveyor components
- One-piece, easy-to-clean design with rivets molded into the top plate
- Fasteners are applied with the Alligator® Spin Set™ installation tool where the rivets are spin set through heat and friction to provide a long lasting splice.

Options:

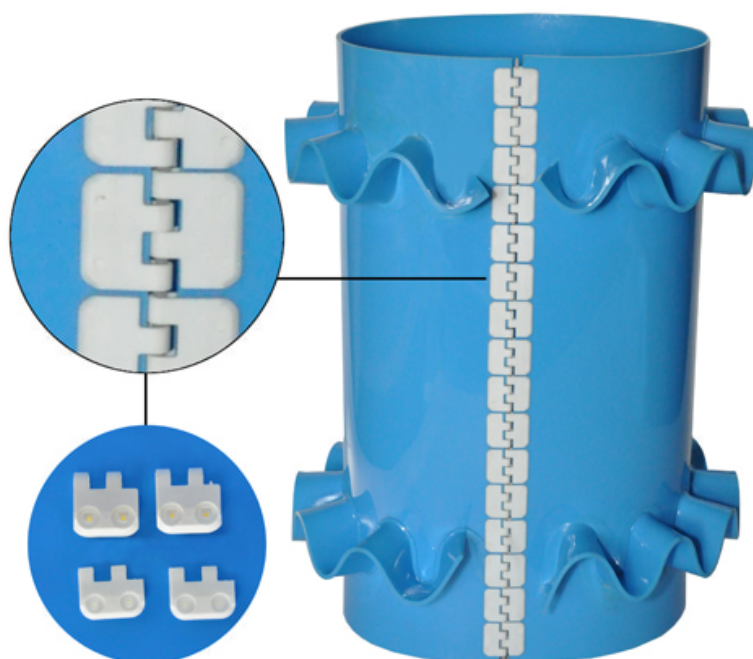

- UV-resistant black plastic for outdoor applications
- FDA-accepted white plastic
- Blue plastic for use with blue colored belting used in the food industry

Applications:

- Pharmaceutical and food processing, metal stamping, and operations with metal detectors or X-ray equipment
- Belts from 1/32" – 1/8" (0.8 – 3.2 mm) thick, with mechanical fastener ratings up to 65 P.I.W. (11 kN/m) and minimum pulley diameters from 1-1/2" – 3" (38 - 75 mm)
- Operating conditions from -20F to 180 F (-29C to 82C)

Product Size	Min Pulley Diam. (inch)	Belt Thickness (inch)	PIW max	Approx. Hinge Pin Diameter (inch)
APF100	1 1/2	0" - 3/32"	40	
APF150	3	1/16" - 1/8"	65
